Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided into parts corresponding to the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to identify the classes, and the prices of the semiannual issues.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Information as to changes of copyright ownership is not included in the *Catalog*, but a search of the Copyright Office Assignments and Related Documents Indexes may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of \$3 per hour.

In the case of each registration listed, except for renewals, there has been deposited a copy or copies of the work in accordance with the provisions contained in section 12, 13, 14, or 215 of Title 17 of the *United States Code*.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402. Orders may be placed for individual issues, as subscriptions for one or more parts, or for the complete *Catalog* at \$20 a year, and for periods of one, two, or three years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Superintendent of Documents.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington, D.C., 20540.

Organization of Parts

Each part listed in the following table records all current registrations in the class or classes indicated by the alphabetical symbols. Renewal registrations are listed separately at the end of each related part. The first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for the purpose of statistical analysis. A zero immediately following the symbol, e.g., AF0, EF0, identifies a foreign work deposited under the waiver-of-fee provision (section 215 of Title 17 of the *United States Code*). Some parts also contain registrations made under other symbols if the subject matter or type of material is similar to that generally included in the part.

Introduction

PARTS 7–11A list domestic and foreign works registered in classes G, H, I, J, and K, with the exception of commercial prints and labels which, registered in class K under the symbol KK, are listed in Part 11B. Works for which the subsisting copyright has been renewed are listed separately in the Renewal Registrations section. The works listed include original paintings, drawings, designs for textiles, works of art, and three-dimensional works of art, charts, architectural and engineering plans and mechanical drawings, anatomical models and other plastic works, photographic prints, filmstrips, slide films, stereoscopic and other transparencies, published reproductions of existing works of art in the same or a different medium, and published prints and pictorial illustrations, including picture post cards, greeting cards, cartoons, and prints used for calendars, posters, etc.

Arrangement is alphabetical under the name of the copyright claimants, or, in the case of filmstrips, under title. Each work is described in a main entry which includes information pertinent to the copyright claim. References lead from the names of joint claimants, authors, artists, photographers, and other contributors to the works, and from variant forms of names. In the case of filmstrips the references cover, in addition, the names of producing companies and releasing agents, and

the names of authors and titles of published works upon which the filmstrips are based or with which they are correlated.

The Title Index covers both currently registered works and renewal registrations, the latter being identified by the symbol (R). In some cases where more applicable, the subjects of portraits, the names of geographic areas, etc., are given.

Each main entry for works currently registered includes, in addition to the name or title under which it is filed, the following items of information if available and applicable:

- 1) Title, amplified if necessary by a brief description of the pictorial content of the work, and followed by any variant titles.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Place of publication for works published abroad; place of publication for domestic book-like material.
- 5) Name of the first-named publisher when the publisher is not also the claimant.
- 6) Physical description.
- 7) Series statement.
- 8) Names of authors given in the application which do not appear elsewhere in the entry.

- 9) Name of the employer in the case of a work made for hire, if so named in the application.
- 10) Information contained in the application which relates to the registration of an earlier version of the work.
- 11) Brief statement of the new matter on which copyright is claimed, preceded by the abbreviation NM, if this information is given in the application and is not indicated elsewhere in the entry.
- 12) Copyright symbol ©.
- 13) Name of the copyright claimant.
- 14) For published works, date of publication as given in the application; for unpublished works the date on which the last of all items required to complete registration (i.e., copy, application, and fee) was received in the Copyright Office.
- 15) Registration number.

For published works, whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application are given first, followed by the phrase "in notice"

and the data given in the work; e.g., © John Doe; 10Feb65 (in notice: 1964); K75900.

For renewal registrations, the main entry includes, in addition to the claimant's name under which it is filed, the following items of information if available and applicable:

- 1) Title, including description of the pictorial content of the work.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Brief statement of the new matter on which the original copyright was claimed, preceded by the abbreviation NM if available in the renewal application.
- 5) Copyright symbol ©.
- 6) Date of original copyright.
- 7) Original registration number.
- 8) Name of the renewal claimant followed by a statement in parentheses, usually abbreviated, giving the basis of the renewal claim as supplied by the applicant; e.g., "John Doe (NK)" indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.
- 9) Date of receipt of the renewal application or fee, whichever is later.
- 10) Renewal registration number.

L.C. card 6—35347

This number identifies the Library of Congress printed card for the complete series of the *Catalog of Copyright Entries*.

For sale by the Superintendent of Documents,
U.S. Government Printing Office, Washington, D.C.
20402. Price of this part is given on page vi.

Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided into parts corresponding to the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to identify the classes, and the prices of the semiannual issues.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Information as to changes of copyright ownership is not included in the *Catalog*, but a search of the Copyright Office Assignments and Related Documents Indexes may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of \$5 per hour.

For each registration listed, except for renewals, there has been deposited a copy or copies of the work in accordance with the provisions contained in sections 12, 13, 14, or 215 of Title 17 of the *United States Code*.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Orders may be placed for individual issues, as subscriptions for one or more parts; or for the complete *Catalog* at \$20 a year, and for periods of one, two, or three years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Superintendent of Documents.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington, D.C. 20540.

Organization of Parts

Each part listed in the following table records all current registrations in the class or classes indicated by the alphabetical symbols. Renewal registrations are listed separately at the end of each related part. Some parts also contain registrations made under symbols other than those listed for the particular part, if the subject matter or type of material is similar to that generally included in the part.

The first letter of the symbol is that of the class under which registration is made. Second and third letters, if any, that follow the initial letter are added by the Copyright Office for the purpose of statistical analysis. Their significance is as follows:

Introduction

PARTS 7-11A list domestic and foreign works registered in classes G, H, I, J, and K, with the exception of commercial prints and labels which, registered in class K under the symbol KK, are listed in Part 11B. Works for which the subsisting copyright has been renewed are listed separately in the Renewal Registrations section. The works listed include original paintings, drawings, designs for textiles, works of art, and three-dimensional works of art, charts, architectural and engineering plans and mechanical drawings, anatomical models and other plastic works, photographic prints, filmstrips, slide films, stereoscopic and other transparencies, published reproductions of existing works of art in the same or a different medium, and published prints and pictorial illustrations, including picture post cards, greeting cards, cartoons, and prints used for calendars, posters, etc.

Arrangement is alphabetical under the name of the copyright claimants, or, in the case of filmstrips, under title. Each work is described in a main entry which includes information pertinent to the copyright claim. References lead from the names of joint claimants, authors, artists, photographers, and other contributors to the works, and from variant forms of names. In the case of filmstrips the references cover, in addition, the names of producing companies and releasing agents, and the names of authors and titles of published works upon which the filmstrips are based or with which they are correlated.

The Title Index covers both currently registered works and renewal registrations, the latter being identified by the symbol (R). In some cases where more applicable, the subjects of portraits, the names of geographic areas, etc., are given.

Each main entry for works currently registered includes, in addition to the name or title under which it is filed, the following items of information if available and applicable:

- 1) Title, amplified if necessary by a brief description of the pictorial content of the work, and followed by any variant titles.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Place of publication for works published abroad; place of publication for domestic book-like material.
- 5) Name of the first-named publisher when the publisher is not also the claimant.
- 6) Physical description.
- 7) Series statement.
- 8) Names of authors given in the application which do not appear elsewhere in the entry.
- 9) Name of the employer in the case of a work made for hire, if so named in the application.
- 10) Information contained in the application which relates to the registration of an earlier version of the work.
- 11) Brief statement of the new matter on which copyright is claimed, preceded by the ab-

breviation NM, if this information is given in the application and is not indicated elsewhere in the entry.

- 12) Copyright symbol ©.
- 13) Name of the copyright claimant.
- 14) For published works, date of publication as given in the application; for unpublished works the date on which the last of all items required to complete registration (i.e., copy, application, and fee) was received in the Copyright Office.
- 15) Registration number.

For published works, whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application are given first, followed by the phrase "in notice" and the data given in the work; e.g., © John Doe; 10Sep65 (in notice: 1964); K74300.

For renewal registrations, the main entry includes, in addition to the claimant's name under

which it is filed, the following items of information if available and applicable:

- 1) Title, including description of the pictorial content of the work.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Brief statement of the new matter on which the original copyright was claimed, preceded by the abbreviation NM if available in the renewal application.
- 5) Copyright symbol ©.
- 6) Date of original copyright.
- 7) Original registration number.
- 8) Name of the renewal claimant followed by a statement in parentheses, usually abbreviated, giving the basis of the renewal claim as supplied by the applicant; e.g., "John Doe (NK)" indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.
- 9) Date of receipt of the renewal application or fee, whichever is later.
- 10) Renewal registration number.
